

HOLD FOR RELEASE UNTIL JULY 11, 2018

LIGHTMED Corporation Announces New Office Location in Caesarea, Israel

San Clemente, CA – July 11, 2018 – LIGHTMED Corporation, a global ophthalmic medical device company, today announced it has opened a new office location in Caesarea, Israel to expand its business and technological investments, and leverage Israel’s diverse and experienced medical technology talent pool.

“This is an exciting time for LIGHTMED. We are growing rapidly worldwide and we want to support this growth by investing in new technologies. Opening an office at the Caesarean Smart Industrial Technology Park in Caesarea, Israel was a logical step and is just the beginning. The office is in a prime location that’s easily accessible and perfectly situated halfway between Haifa and Tel Aviv. The area is also populated with highly skilled professionals who have graduated from distinguished universities – this will surely help us further extend our professional services and customer support teams,” said Shlomo Alkalay, CEO of LIGHTMED.

LIGHTMED Executive Chairman Gary Lee added, “It has always been a dream of mine to expand and open a technology center in the European and Middle Eastern territory. Strategically it makes sense since we have a large existing customer base there with huge growth potential. Soon after Shlomo came on board as CEO, I knew he would help turn my vision into reality.”

In addition to this new office location, LIGHTMED has offices in San Clemente, California; Taipei, Taiwan and Tokyo, Japan.

About LIGHTMED Corporation:

LIGHTMED is a medical device and technology company focused on developing, manufacturing and marketing a full spectrum of innovative laser systems for the ophthalmic market. The company’s product suite includes advanced solutions for cataract, glaucoma, corneal, and retinal diseases. LIGHTMED has been in business since 1997 with its own R&D and manufacturing facility. All of LIGHTMED’s products are backed by an industry leading warranty and are guaranteed with proactive routine inspections through its sales and service centers

located worldwide.
